Allowable Subject Matter

3. **Claims 1-30, 32-44** are allowed. Claims 4-11 have been re-numbered to 7-11, 4-6 respectively.

The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, 14, and 32 the cited prior art fails to teach or suggest the claimed limitations with the reasons set forth in the Applicant's Remarks filed on 03/23/06, and 06/10/06.

Newly discovered U.S. Patent Number 6,219,539 to Basu et al. teaches the systems and methods for implementing private wireless communications which includes a dual mode mobile station operable to selectively communicate in CDMA and analog modes and a home base station (wireless PBX). The home base station includes circuitry for establishing analog wireless communications with the mobile station in the analog mode and circuitry for establishing communications with a wireline communication system, the base station thereby allowing an exchange of information between the mobile station and the wireline system in the analog mode. However, Basu still fails to teach nor suggest a method in a wireless centrex system for alerting a mobile station of a call that is directed to a subscriber's directory number from a predetermined directory number having a step of receiving a call from a call originating directory number directed to a directory number of a subscriber via a line side interface

of a local digital switch at an intelligent transceiver of the wireless centrex system, and such that the subscriber having a mobile station currently registered with said intelligent transceiver of said wireless centrex system.

Conclusion

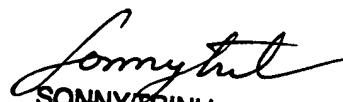

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
